

Hot and Cold Locations

Year Group: 1

Subject Focus: Geography

Term: Spring 1

Key facts

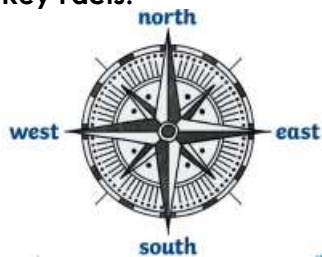

- Recap: United Kingdom is made up of four countries; Scotland, Northern Ireland, England and Wales. We live in England.
- The whole world is split into seven continents. England is in a continent called Europe.
- The continents have different climates because of where they are on the Earth.
- Places which are closer to the equator are the warmest.
- Places which are furthest from the equator are very cold.
- When we are finding directions, it is useful to know North, South, East and West.

Parents as partners:

- Visit a local Travel Agents and look at the brochures. What would you take on a holiday to a hot place? What would you need to take if you visited a cold place?
- Look at a map or globe. Can you find the United Kingdom?
- Research the animals that live in the Antarctica and Africa. How do you think they can survive in very cold or very hot temperatures?
